DENTAL HYGIENE

ABOUT THE PROGRAM

The Dental Hygiene Program provides students with the knowledge and skills necessary to assess, plan, implement, and evaluate dental hygiene care for the patient. During the initial stages of learning, students interact in simulation and radiology labs to practice skills on dental manikins in order to master skills related to patient treatment. An 18-chair state-of-the-art dental clinic provides students the ability to practice the following skills: infection control, prepare the operator, take patient medical histories, expose radiographs, note abnormalities, plan care, teach oral hygiene, clean teeth, apply preventive agents, complete patient chart entries, and perform other duties related to oral hygiene care.

CCCC Career Community

Students interested in Health Sciences like to help people feel better. They can work independently, but prefer to work in groups or teams. They are detail-oriented, compassionate, and think critically to solve problems. They work well in stressful situations and do not get queasy around blood or bodily fluids. Graduates find jobs working in medical or wellness environments.

R I A S X E C X

Possible Employment In Industry

Offices of Dentists
Employment Services
Offices of Physicians

Top Employers In Region
